

# Leningrad Food Forest Resources Factory

# About Us

**2000 sq.m.**

Production  
and storage facilities

**1,5 tons**

Maximum daily output of  
finished products

**500 tons**

Maximum annual output of  
finished products

We gather raw materials only in ecologically clean areas of the Siberian taiga. Our pine nuts ripen in the wild without human intervention - after all, we understand how valuable is the natural origin, which confirms ecological purity and high benefits. We harvest the selected pine nuts, and then process, observing the principles of organic production. For this purpose, we annually organize our own harvesting, and also purchase only the best raw materials from reliable suppliers from the Altai Republic, the Tomsk and the Omsk Regions, Zabaykalsky Krai and Krasnoyarsk Krai. Our company employs highly-qualified specialists who are responsible for the quality of products.

# Production

The production site is located near the places for harvesting of natural raw materials

---

All raw materials are processed using modern equipment

---

Production and storage areas of the company are more than 2000 sq. m.

## Plans for the future

The company has approved a plan for a step-by-step expansion of production — by the season 2018/2019 we will be able to increase annual volumes of our product up to 3000 tons due to the opening of the second production site in the Vsevolozhsk town of the Leningrad Region, where the head office of our company and the warehouse of finished products are now located. Such proximity to the seaport of St. Petersburg allows us to respond quickly to the need of our foreign buyers for high quality and always fresh cedar nuts.

# Products

## Kernel of pine nuts

Nutritional value per 100 g:  
Proteins 13-14 g  
Fats 65-69 g  
Carbohydrates 12-15 g  
Energy value 875 kcal / 100 g

Kernels of pine nuts are saturated with vitamins of group B (B1, B2), vitamin C, as well as calcium, magnesium, potassium, iron, phosphorus. One handful of pine nuts replenishes the daily need of an adult in amino acids and trace elements, such as cobalt, copper, manganese and zinc.

Kernels of pine nuts are rich in polyunsaturated fats Omega-3-6-9 and vegetable protein. Vegetable protein is perfectly balanced, its composition is close to human tissue proteins, and it can be absorbed by the body by 99%.

## Cedar shell

The shell contains: microelements, minerals, calcium, iodine, boron, vitamin C. 70% is made up of fiber. Contains a large amount of tannins, which have anti-inflammatory and wound-healing properties.

Cedar shell is suitable as a raw material for activated carbon, fuel briquettes, for mulching of soil, producing environmentally friendly finishing materials "kedroplast", is used in cosmetics as a scrub. Also, the shell is widely applied in folk medicine and is used when the digestive system is disturbed, it is good for strong bones and joints, alleviating blood diseases and disorders of the cardiovascular and lymphatic systems.

## Cedar nut film

A thin shell covering the kernel of pine nuts is a source of nutrients. It is widely used for therapeutic purposes, decoctions, ointments and medicines are based on it. Also, the nut film is used in cosmetology, for example, for the production of nourishing facial masks. The film of cedar nuts is used for stuffing mattresses, pillows, and blankets. Carefully cleaned cedar film is a hypoallergenic filler.

# Packaging

## Flowpack packaging

Display package

Net weight - 50 g

Dimensions: 85 x 135 mm

Bilingual label

## Tube packaging

Tube with the cut out "window"

Net weight - 100 g

Dimensions: 63 x 120 mm

Bilingual label

## Doypack packaging

Display package

Net weight - 100 g

Dimensions: 95 x 180 mm

Bilingual label

## Packing "plastic sauce cup"

Plastic container with sticker

Net weight: 50 g

Dimensions: 30 x 62 mm

Russian label

EUROPEAN UNION REGULATIONS (EC)  
NO 834/2007, NO 889/2008, NO 1235/2008

RU-BIO-112

This is the uniform mark of the European Union applied to the packaging of organic food products grown without any chemical fertilizers. Thanks to deep integration of the market, even non-EU countries agree of their rules for the production of food products with the food legislation of European organic certification.

All “Organic” products are marked with a single European logo “organic” in the form of a leaf. A new uniform standardized EU code should be placed next to the new marking for organic products.

Natural purity of our products is guaranteed by the fact that pine nuts can only grow in wild conditions: in the clean forests of the Siberian taiga, on the picturesque sides of Altai and Shoria mountains, in the vicinity of the transparent waters of Lake Baikal. Nobody has ever grown a pine nut artificially, because only Siberian nature can provide so much benefit, strength and energy, concentrating all this in every cedar seed.

For you to be sure of the organic nature of our products, we have implemented organic production standards of such authoritative quality systems as USDA NOP organic regulations, 7 CFR Part 205 and European Union Regulations (EU) No. 834/2007, No. 889/2008, and No. 1235 / 2008.

USDA NOP ORGANIC REGULATIONS,  
7 CFR PART 205

This is the National Organic Standard, which was issued by the US Department of Agriculture after adoption of the program for the transition of citizens to the consumption of organic products. The certification is made by the US Department of Agriculture, as well as the authorized agents. The certificate is widely distributed in the US, Canada and other countries of the American continent.

# For Partners

The work of our team is based on the principles of decency, professionalism and priority of the client's interests. Our company is open to cooperation and ready to become your reliable partner.

Our company is ready to cooperate with

- Russian and foreign retailers;
- aggregators of commodity lines;
- Russian and international traders;
- sales agents;
- specialized shops of organic food products;
- souvenir shops;
- other interested parties.

We offer cooperation within contract production of products under your trademark.

## **At your service**

- production capacities, which allow processing up to 1500 tons of raw materials a year;
- more than 2000 sq. m. of production and storage facilities;
- modern equipment;
- professional production staff;
- delivery of products throughout Russia;
- quick export deliveries all over the world;
- making any package according to your requirements, including gift and souvenir sets

# Export

Our warehouses are in close proximity to the seaport of St. Petersburg. It allows us to deliver always fresh and quality products all over the world. In addition to sea freight, we also ship products by road from the warehouse in St. Petersburg.

Pine nuts, being a unique national natural resource, refer to goods that are restricted to be exported from the territory of the Russian Federation and the countries of the Eurasian Economic Community. For the possibility of export deliveries, a special license is required from the Ministry of Industry and Trade of Russia, which can be obtained only by confirming the place of origin and the lawfulness of harvesting.

Single list of goods subject to prohibitions or restrictions on import or export by the Customs Union member states within the EurAsEC when trading with third countries and Provisions on application of restrictions has been approved by the Decision of the Board of the Eurasian Economic Commission No. 134 as of August 16, 2012 (see section 2.6 “Living wild animals and selected wild plants restricted for movement across the customs frontier of the Customs Union at export”).

Our raw materials are harvested on our own in lawfully leased forest plots, and we purchase them only from those partners, in the reliability of which we are sure, and who are able to confirm the origin and legality of the harvested crop. Thus, we have all the necessary documents for quick export deliveries.
